Technical Description

The complete list of K:Works sound programs is divided into the following soundware categories:

- Analog & Digital
- Orchestral
- Modern Synth
- Workshop
- Drums & Percussion
- Electro
- Extreme

Each K:Works category is color coded to make its visual identification easier.

When searching the PDF file for soundware categories or for individual volumes, we recommend the use of the predefined bookmarks.

Each individual page of the K:Works “Sound Program List” describes one sound bank (1 - 100 programs) together with the relevant folder (product code) name, the name of the sound bank and total number of sound programs included. If a sound bank includes more than 100 programs it is listed across a number of pages.

With kind permission from Kurzweil company, all original ROM and FARM programs, supplied with K2xxx instruments, are included free of charge as a part of our K:Works collection. These sound programs, however, were carefully re-categorized and reordered to make them very easy to navigate, access and use. To allow for future K:Works collection development and expansion without the need for frequent restructuring in order to maintain a continuity of the sound banks and of its individual programs we have, in most cases, listed the original Kurzweil programs at the beginning of each relevant bank. Where a K:Works sound bank contains original Kurzweil programs these were clearly labeled so that they can be immediately identified as such. This is achieved with a label “Original Kurzweil Programs” located on the left hand side of your instrument display. (See pictures below.)

It is also possible to further identify the original Kurzweil K2xxx programs in the K:Works list by their total number, their heading and also by the label of the ROM and FARM from which they originate. (e.g. BASIC ROM, CONTEMPORARY ROM, ORCHESTRAL ROM, K2600 FARM, K2500 FARM, etc.).

All K:Works sound banks also contain technical information about the preset values of individual MIDI real time controllers (e.g. Pitch Wheel, Modulation Wheel, Data Entry, Aftertouch, etc.).

All text notes and abbreviations which form part of each K:Works sound bank are listed in the following document.

- BASIC ROM
- PIANO ROM
- CONTEMPORARY ROM
- ORCHESTRAL ROM
- (i) K2661 FARM
- (i) K2600 FARM
- (i) K2500 FARM
- (i) K2000 FARM

These display captures denote original Kurzweil ROM and FARM programs.

Copyright © 2008 Art of Sound

- .. WELCOME ..

This display capture denotes each individual K:Works sound bank, which does not contain any original Kurzweil ROM or FARM programs.

- (i) NEW SOUNDS

This display capture denotes new K:Works sound programs.

- (i) BONUS

This display capture denotes new K:Works sound programs or program variations which form part of the selected sound bank. This display capture refers to Art of Sound soundware which has been bundled with the K:Works collection free of charge as a bonus.

- <><><><><><><><>

This display capture denotes a separation between two kinds of sound programs.

- <><><><><><><MW>

This display capture indicates that the Modulation Wheel is the activated controller that can be used for real-time control of individual sound parameters or their combinations. (For example vibrato, tremolo, frequency filter, volume, effect modulation depth, etc.).

- <><><><><><><PW>

This display capture (Pitch Wheel) indicates that the standard pitch bend of (± 200 cents) for the selected sound program was modified (for example to -2400/+1200 cents).

Note:

These modified pitch band settings are often utilized for FX or experimental Drums & Percussion programs.

- <><><><><><><CS>

This display capture indicates that the Data Entry slider is the activated controller that can be used for real-time control of individual sound parameters or their combinations. (For example vibrato, tremolo, frequency filter, volume, effect modulation depth, etc.).

- <><><><><MPress>

This display capture indicates that the Mono Pressure (Aftertouch) is the activated controller that can be used for real-time control of individual sound parameters or their combinations. (For example vibrato, tremolo, frequency filter, volume, effect modulation depth, etc.).

- <><><><><SusPdl>

This display capture indicates that the Sustain Pedal is the activated controller that can be used for real-time control of individual sound parameters.

- <><><><> <MW/CS>
- <><MW/CS/MPress>
- <><MW/PW/SusPdl>

etc.

These display captures denote a number of combinations of activated MIDI controllers that can be used for real-time control of K:Works sound program parameters.

Copyright © 2008 Art of Sound

Note:

The above shown display captures do not denote the names of sound programs. For this reason no sound will be generated upon pressing the keyboard while the above headings/abbreviations appear on your Kurzweil K2xxx instrument display.

To display all information text notes and abbreviations relevant to each pre-defined MIDI controller use LCD “List view mode”. To change the “Large view mode” to the “List view mode”, press the View soft button in Master Mode.

Note:

All information text notes and abbreviations relevant to each pre-defined MIDI controller in the “Sound Program List” are identical with those displayed on K2xxx LCD. We believe that displaying this technical information directly in each K:Works sound bank will help you utilize the potential of the entire collection of programs more effectively.

For K:Works sound banks that do not include the above mentioned information about controller settings, please use the Modulation Wheel and the Data Entry slider for standard adjustments of the vibrato or filter cutoff.
