

Art of Sound®

Professional soundware solution

Professional sound programs for Kurzweil K2661, K2600, K2500 and K2000 synthesizers.

The K:Works - Analog & Digital collection contains more than 900 professional sound programs.

K:Works™ ANALOG & DIGITAL

K:Works - Analog & Digital is a special collection of sound programs which offers emulations of the legendary analog & digital synthesizers e.g. Arp™, Moog™, Oberheim™, Prophet™, PPG™, Yamaha™ DX/TX, etc. This soundware collection contains warm and sharp analog sweeps, experimental and "ice-cold" digital pads, synth basses, mono and poly leads, sequencer programs, filtered and specially modulated noises and synth effects.

The K:Works collections are available as "EX" versions for expanded Kurzweil K2600, K2500 and K2000 synthesizers (with optional ROM boards installed) and "LE" versions for non expanded instruments.

The K:Works collections for Kurzweil K2661 synthesizers are virtually identical to K:Works "EX" for Kurzweil K2600 series, however, the text information in the sound banks and the technical documentation is different. Since the Kurzweil K2661 series already includes the expansion ROM boards factory installed, the K:Works soundware collections for Kurzweil K2661 do not contain "LE" versions.

The K:Works collections are available for Kurzweil K2661, K2600, K2500 and K2000 series.

The K:Works collections are also available as individual soundware categories:
