Technical Description

A description of the VIR2ALL – Blue Electro sound program collection is divided into three pages with the folder (product code) name, the name of the sound bank and the number of the included sound programs.

A detailed description of the predefined real-time MIDI controllers (e.g. Velocity Sensitivity, Aftertouch and Modulation Wheel) is listed next to the name of the each sound program.

If a sound program uses interval tuning of individual oscillators then the Interval column lists this information. Numbers in the range of one octave are used for comprehensive labeling of individual intervals (e.g. 1 - 4 indicates one fourth, etc.).
