Art of Sound

Professional soundware solution

VIR2ALL

Sound Program List

Access Virus

Table of Contents

Technical Description

The complete list of the VIR2ALL sound programs is divided in the following categories:

- Ambient
- Cyber Trance
- Noise FX
- 80s Retro

Each VIR2ALL category is color coded to make its visual identification easier.

We recommend the use of the predefined bookmarks, when searching for soundware categories in the PDF version of the document.

Descriptions of the individual VIR2ALL sound banks are, in each case, divided into three pages with the folder (product code) name, the name of the sound bank and the number of the included sound programs.

A detailed description of the predefined real-time MIDI controllers (e.g. Velocity Sensitivity, Aftertouch and Modulation Wheel) is listed next to the name of the each sound program.

If a sound program uses interval tuning of individual oscillators then the Interval column lists this information. Numbers in the range of one octave are used for comprehensive labeling of individual intervals (e.g. 1 - 4 indicates one fourth etc.).
